

Informed consent on the medical examination

within the framework of Aktion Seelöwe-PLUS

Dear parents and guardians,

by means of specific measures predominantly taken by the Bavarian State Working Group for Dental Health (LAGZ), tooth health of Bavarian school children has notably improved in recent years. LAGZ (an association of dental corporations and all health insurance associations) has triggered and supported this positive development for the last 20 years and is still dedicated to this important and valuable task.

LAGZ is charged by the Land of Bavaria to improve dental health by offering individual programs. In Bavarian pre-schools facilities this has been achieved by the successful introduction of „Aktion Seelöwe-PLUS“. This initiative is designed to motivate children to visit their dentist semiannually.

After having taught your children about oral hygiene and dental health diet at pre-school already, we would like to do a quick examination of their oral cavity.

The examination is planned on _____ and will be performed by LAGZ dentist _____ (phone: _____).

This measure will be free of cost for you.

In case of question please contact the above mentioned LAGZ dentist.

With kind regards,
your LAGZ

Aktion Seelöwe-PLUS 14/15
healthy teeth – healthy children in Bavarian kindergartens

When you are at your dentist's, you have a blue sticker stamped und stick it onto the collection poster in your kindergarten. As a reward I give you two Goldie-stickers! One for each visit at your dentist's.

Please have one sticker stamped by your dentist for each semiannual examination.

Aktion Seelöwe-PLUS 14/15
healthy teeth – healthy children in Bavarian kindergartens

Dear parents,

as every year Aktion Seelöwe starts in all Bavarian kindergartens and day nurseries. By means of this initiative the semiannual visit at the dentist shall become normal for the children. It is essential that the condition of the childrens' teeth since caries spreads quickly on primary teeth. The dentist takes care of your child's dental health from the day of the first primary tooth. Healthy primary teeth are crucial for talking, chewing and to develop healthy permanent teeth.

Dear parents, we kindly ask you to support the initiative and its goals

Please have the stickers stamped after the visit at the dentist. Your child should stick the stamped sticker onto a special collection poster in kindergarten or day nursery. Towards the end of July the facilities report the results to LAGZ. One out of two participants win cash or material prizes. All are rewarded certificates. Among all participating facilities day trips to animal parks are raffled.

Many thanks for your support!

With kind regards,

your LAGZ

By the way: All costs are covered by state health insurance companies.

Aktion Seelöwe-Plus
healthy teeth – healthy children in Bavarian kindergartens

Dear parents, please note:

- ☐ make sure that your child sees the dentist twice a year
- ☐ Preventive check-ups by your dentist are costless
- ☐ The examination at school does not replace regular, semiannual check-ups by your dentist
- ☐ After a preventive check-up the dentist stamps a Goldie-sticker at the frontpage of this card. The stamped stickers are being collected in Kindergarten or day-nursery. If the facilities report their collection results, they may win cash or material prizes.

Kind regards,

your LAGZ

Aktion Seelöwe-Plus

Your child has just been examined by a LAGZ dentist.
The LAGZ dentist recommends:

- ☐ visit the dentist regularly twice a year with your child for preventive check-ups
- ☐ IMPORTANT: thorough examination and treatment by a dentist is necessary.
